Website • Github • Google Scholar • LinkedIn • X •

## RESEARCH INTERESTS

Probabilistic Machine Learning, Time-series forecasting, Uncertainty Quantification, Conformal Prediction.

## EDUCATION

|   |                            |
|---|----------------------------|
| <b>School of Engineering and Applied Science, University of Pennsylvania</b>  | <i>Sep 2020 – Present</i>  |
| <i>PhD Candidate in Bioengineering, AI2D Center for AI and Data Science</i>    |                            |
| • Advisor: Prof. Christos Davatzikos  Co-Advisor: Prof. Haochang Shou                               |                            |
| • Research focus: Deep kernel learning for time-series forecasting - irregular and sparse biomarker data.   |                            |
| <b>Wharton School, University of Pennsylvania</b>   | <i>Jan 2023 – Mar 2025</i> |
| <i>MSc Statistics and Data Science</i>  |                            |
| • Advisor: Prof. Edgar Dobriban    |                            |
| • Relevant coursework: Bayesian Modeling, Advanced Statistical Inference, Applied Econometrics, Statistical Learning Theory   |                            |
| <b>National Technical University of Athens</b>  | <i>Nov 2013 – Nov 2019</i> |
| <i>Diploma in Electrical and Computer Engineering (5-year joint BSc &amp; MEng)</i>   |                            |
| • Major: Computer Software, Signals, Control and Robotics; Minor: Computer Systems, Bioengineering.   |                            |
| • Advisor: Prof. Petros Maragos    |                            |
| • Thesis: <i>An Exploration of Deep Learning Architectures for Handwritten Text Recognition</i>   |                            |
| • GPA: 8.56/10  |                            |

## RESEARCH EXPERIENCE

|  |                            |
|--|----------------------------|
| <b>Research Assistant, Artificial Intelligence in Biomedical Imaging Lab</b>   | <i>Aug 2020 – Present</i>  |
| <i>Supervisors: Prof. Christos Davatzikos , Prof. Haochang Shou </i> |                            |
| • Affiliated with the AI2D Center for AI/Data Science for Integrated Diagnostics and Penn Statistics in Imaging and Visualization Endeavor (PennSIVE).   |                            |
| • Published work in top ML venues ( <b>ICLR</b> , <b>NeurIPS</b> ), contributing methods in biomarker forecasting, uncertainty quantification and clinical translation.  |                            |
| <b>Undergraduate Research Assistant, Computer Vision and Speech Communication Lab</b>  | <i>Mar 2018 – Nov 2019</i> |
| <i>Supervisor: Prof. Petros Maragos </i>  |                            |
| • Completed thesis on <i>An Exploration of Deep Learning Architectures for Handwritten Text Recognition</i> , focusing on sequence modeling and statistical learning for structured data.  |                            |
| • Published at <b>ICPR 2020</b> : Enhanced sequence recognition using N-gram decomposition and multitask learning  |                            |
| • Tools: Python, PyTorch; experience with CNNs, sequence models, regularization techniques, and optimization for large-scale training.   |                            |

## INDUSTRY EXPERIENCE

|   |                             |
|---|-----------------------------|
| <b>Machine Learning Researcher, NASA Frontier Development Lab</b>   | <i>June 2021 – Aug 2021</i> |
| <i>Supervised by Dr. Piotr Bilinski  and Dr. Frank Soboczenski </i> |                             |
| • Developed automated systems for analyzing and generating structured reports of natural events using metadata-driven modeling and <b>Large Language Models</b> .   |                             |
| • Built and fine-tuned large-scale models with <b>PyTorch</b> , <b>PyTorch Lightning</b> , and <b>Hugging Face</b> , integrating optimization, evaluation, and monitoring pipelines.  |                             |
| • Deployed models on <b>Google Cloud Platform</b> and managed experiment tracking using Weights&Biases.   |                             |
| <b>Machine Learning Research Intern, RetinAI Medical AG</b>   | <i>Dec 2019 – Aug 2020</i>  |
| <i>Supervised by Dr. Sandro De Zanet </i>  |                             |
| • Developed statistical methods for <b>image data validation</b> and <b>out-of-distribution detection</b> using kernel density estimation and feature-based uncertainty metrics.  |                             |
| • Built predictive models for <b>disease progression</b> , involving regression over temporal clinical variables and uncertainty-aware deep learning techniques.  |                             |
| • Implemented end-to-end ML pipelines in <b>Python</b> and <b>PyTorch</b> , including preprocessing, modeling, optimization, and validation.  |                             |
| <b>Machine Learning Intern, DeepSea Technologies</b>  | <i>Sep 2018 – Feb 2019</i>  |
| <i>Research and Development Department</i>  |                             |

- Maintained and enhanced production ML frameworks using **TensorFlow**, **Python**, and **Flask**, improving model reliability and deployment workflows.
- Conducted EDA and built **regression models for vessel power–velocity prediction**

### Software Engineering Intern, Nokia TC Athens

Sep 2017 – Mar 2018

#### Research and Development Department

- Performed unit testing and contributed to automated QA processes for large-scale distributed systems.
- Automated testing pipelines and improved development workflow using **JIRA** and CI tooling, significantly increasing engineering efficiency.

## TECHNICAL SKILLS, FRAMEWORKS

---

**Languages:** Python, R, C, Matlab, ML NJ, Prolog

**Machine Learning/Deep Learning Frameworks:** Pytorch, Pytorch Lightning, Pyro, GPytorch

**General:** Unix based OS, MS OS, LaTeX, Version Control (Git)

## LANGUAGES

---

English (Proficient-C2), German (Intermediate-B1), Greek (Native)

## HONORS-AWARDS

---

**Leventis Foundation Scholarship of Academic Excellence**  
Awarded 6000 USD for my PhD studies

July 2024

**Leventis Foundation Scholarship of Academic Excellence**  
Awarded 6000 USD for my PhD studies

July 2023

**Gerondelis Foundation Scholarship of Academic Excellence**  
Awarded 5000 USD for my PhD studies

Nov 2021

**1st Year PhD Fellowship - University of Pennsylvania**  
Awarded full scholarship of 80000 USD for the first year of my PhD Studies

Aug 2020

**The Great Moment of Education Scholarship**  
Awarded 1000 EU because I achieved the highest score in National University Entrance Exams in my school.

Oct 2013

## SOCIETIES, AFFILIATIONS AND SERVICE

---

Co-organizer of **WiML Social @ ICLR 2025**

Reviewer at **ICLR 2026**, **NeurIPS 2025**, **Nature Aging**, **ICLR 2025**, **ISBI 2024**, **MLCN 2024**, **WiML Workshop @ NeurIPS 2024**
